

HyMeX Workshop on Drought and Water Resources

Zaragoza (Spain), 5-7 April 2016

General information

The aim of this workshop is to enhance the scientific work of the HyMeX Water Resources and Drought Science Team (WR&D ST). The meeting will be held at the central office of the Spanish National Research Council (CSIC) at Zaragoza ([Pza. Emilio Alfaro 2-3, Zaragoza](#)).

Zaragoza is well communicated by plane and fast rail (from Madrid, Barcelona, Montpellier, Marseille, Paris, etc.). There will be a limit of 40 participants.

Objectives

The main objectives of this workshop are to present the state-of-the-art in drought and water resources research, coordinate and strengthen the HyMeX community in this area and discuss the future lines of work.

The workshop will be structured by main topics of priority identified by HyMeX :

1. **Description of Mediterranean drought** (datasets, models and societal impacts of past droughts).
2. **Understanding of drought processes** (drought propagation within the system, feedbacks, interactions with climate change and water resources, aerosols, vegetation, etc.).
3. **Predicting drought** (data assimilation, seasonal forecasting, model improvement, impacts of climate change, and links with policy).

Proposals for presentations or posters on these 3 topics are welcome and should be submitted before the deadline indicated below. The abstract will be selected by the Scientific Committee. The attendance to this workshop will be limited to 40 participants.
