

OCTOBER 9-10 2023 Sala della Cooperazione, Trento (Italy)

Flood hazard,
mitigation works and residual risks:
how can we manage changes over
time?

PROGRAM

OCTOBER 9 Results of the project "Improving flood hazard governance strategies following the October 29, 2018 event in the Rotiano Torrent" and international contributions

09:30 - 10:00 Registration

10:00 - 10:20 Greetings of the Authorities and opening of the workshop

10:20 - 12:30 Presentation of the results of the project "Improving flood hazard governance strategies following the October 29, 2018 event in the Rotiano Torrent"

Lorenzo Malpaga - Autonomous Province of Trento

Improving flood hazard governance strategies following the October 29, 2018 event on the Rotiano torrent

Marco Borga - University of Padova

Hydro-meteorology of the October 29, 2018 flood event, accounting for climate change

Giorgio Rosatti - University of Trento

The Rio Rotiano event and its challenges to the mathematical and numerical modelling of debris flow phenomena

Lorenzo Marchi - National Research Council

From the Rio Rotiano to the regional scale: Identifying and managing protection structures at risk

12:30 - 13:30 Lunch break (free lunch)

13:30 - 15:00 The components of a changing risk

Guillaume Piton - INRAE, France

Torrent control with check dams: historical evolution in France

Eva Gertsch - BAFU, Switzerland

Dealing with aging protection systems in torrents - case studies and guidelines for practice in Switzerland

Gian Battista Bischetti - University of Milano, Italy

Inspection, functionality assessment and maintenance strategy for torrent control structures

15:00 - 15:20 Coffee break

15:20 - 17:00 **Sven Fuchs** - BOKU, Austria

Vulnerability of elements at risk - assessment approaches from an Austrian perspective

Elena Mondino - Credit Suisse, Switzerland

Changes in flood risk perception and implications for disaster risk reduction

Sandro Raimondi - Public prosecutor attorney of Trento

Flood events: possible judicial implications

OCTOBER 9

Results of the Project "Improving flood hazard governance strategies following the October 29, 2018 event in the Rotiano Torrent" and international contributions

OCTOBER 10

National experiences and experiences of Italian Alpine Regions

A **translation service** will be available during the Workshop.

LOCATION

Sala della Cooperazione Via Segantini 10 Trento (Italy)

REGISTRATION

Free entry with **registration required** before October 2, 2023. https://webapps.unitn.it/form/it/Web/Application/convegni/bacinimontani23

WORKSHOP PRESENTATION

Torrential risk protection works have a long tradition in Trentino, as well as in the Alps in general, where these measures have allowed more intensive use of the landscape since the twentieth century and form the basis for **rational management of the risk of torrential floods**. At present, thousands of protective works of different ages and conditions characterize the watercourses of the Province. The **maintenance and management of protective works** make it possible to control their inevitable deterioration and to extend their life.

The discussion about the future of these works requires a multidimensional evaluation, which concerns not only the structural and maintenance aspects of the single work, but it must also concern the integrated risk management, including residual risk. Today, in fact, protection systems must respond to needs that have changed over time and be flexible towards the uncertainties also linked to climate change. The focus is no longer on purely structural measures, but on an optimal combination of planning-organizational activities and on adequate individual and collection behaviors during flood events.

The meeting aims to frame these problems from an interdisciplinary perspective during the first day with talks by international experts, while on the second day, ongoing experiences in different Italian regional administrations in the Alpine region will be compared.

PROGRAM

14:40 - 16:00

OCTOBER 10	National experiences and experiences of Italian Alpine Regions

OOTOBER 10	reactional experiences and experiences of italian Alpine Regions
09:00 - 09:30	Registration
09:40 - 10:00	Greetings of the Authorities
10:10 - 10:20	National experience
	Martina Bussettini - ISPRA Integration of structural and non-structural risk mitigation measures
10:20 - 11:10	Technical experiences of the Italian Alpine Regions
	Fabio Di Bernardo - Autonomous Region Friuli Venezia Giulia Fabio Da Re - Region Veneto Fabio De Polo - Autonomous Province of Bolzano
11:10 - 11:30	Coffee break
11:30 - 13:00	Fabio Mandozzi - Region Lombardia Antonia Impedovo - Region Piemonte Paolo Ropele - Autonomous Region Valle d'Aosta Stefano Fait - Autonomous Province of Trento
13:00 - 14:00	Lunch break (free lunch)
14:00 - 14:40	Recent experiences

With the patronage of the Professional Association of Agronomist and Foresters and Engineers of the Trento Province and Geologist of the Trentino Alto-Adige Region which recognise the related **training credits**.

ROUNDTABLE DISCUSSION (moderator Raffaele De Col - Autonomous Province of Trento)

Andrea Lazzaroni - Mayor of Dimaro (Italy) - The Dimaro case (October 2018)

Alberto Bellin - University of Trento (Italy) - The Marmolada case (July 2022)
